Skills

- Ruby on Rails
- ViewComponents
- StimulusJs
- Hotwire (Turbo Frames/Streams)
- Rspec
- Sidekiq
- JavaScript
- TypeScript
- React.js
- Next.js
- Node
- Express
- AWS
- Docker
- GCP
- Heroku
- Kubernetes
- HTML
- CSS
- Tailwind CSS
- Circle CI
- Github Actions
- Solidity
- Foundry

Education

05/2024
Ethereum Blockchain and Smart Contract development with Solidity
Eat The Blocks
Remote

04/2014
Web Development Immersive: Ruby on Rails, JavaScript, Backbone.js, PostgreSQL, MongoDB
General Assembly
New York, NY

01/2010
English and German languages and pedagogics
Minsk State Linguistic University
Minsk, Belarus

Dmitry Jum

Profile

Senior Software Engineer with 10+ years of full-stack experience specializing in Ruby on Rails and JavaScript/TypeScript. Builds AI-powered applications combining conversational interfaces, reliable backend systems, and intuitive user experiences. Hands-on technical co-founder with ownership spanning product vision, UX/UI design, architecture, and delivery.

Experience

CitizenMate - Co-founder & Software Engineer
Remote
02/2026 - Present

CitizenMate helps applicants prepare for the U.S. citizenship interview through voice-based practice and personalized AI feedback. *citizenmate.com*

- Conceived and built a voice-based citizenship interview preparation SaaS, owning product direction, feature design, UX/UI, and full-stack development using Ruby on Rails, PostgreSQL, and Hotwire.
- Engineered interactive interview flows integrating speech-to-text, text-to-speech, and AI coaching, with coordinated audio playback, microphone management, and recovery from browser and service failures.
- Designed a hybrid answer-evaluation system combining rule-based grading with targeted AI review, supported by application-level safeguards and regression testing for consistent assessment.
- Built resilient AI integrations with bounded retries, fallback handling, and latency, usage, and cost monitoring.
- Implemented Stripe subscriptions and usage-based billing with an auditable credit ledger, idempotent payment processing, and concurrency-safe balance management.

Intelli Casino - Founding Software Engineer
Remote
07/2024 - 08/2025

- Company Overview: quiz platform generated with OpenAI API, featuring real-time player interactions and spectator betting on outcomes. *intellicasino.net*
- Built real time quiz spectator feature with **Express.js, GraphQL, Websockets and TypeScript (AWS ECR, ECS, Fargate, RDS, ElastiCache)**
- Developed quiz platform with **Next.js and TypeScript (Vercel)**
- Quiz generation is implemented with **OpenAI API** integration
- Wrote a Solidity smart contract for spectator betting and reward distribution
- **Blog series at**: *www.dmitryjum.com/blog?tag=intelli-casino*
- *intelli-casino* | *intelli-casino-dapp* | *intelli-casino-gql-server* on my Github

Independent Consultant - Senior Software Engineer
Remote
04/2024 - Current

- **Web Application Development**: Provide end-to-end solutions in Ruby on Rails and JavaScript/TypeScript (React, Node, Next.js, Express).
- **Parisi Speed School (05/2026–Present):** Provide technical consulting on an AI-powered course and certification advisor built with Python, FastAPI, and the OpenAI API. Collaborate with the Stevens Institute of Technology development team, mentor its lead developer, and plan the backend's transition toward secure, scalable website integration.
- Built **SwingBridge (11/2025-01/2026)**, a **Rails API** integrating **ABC API** and **Mindbody** to automate member eligibility checks and account provisioning. **Read about it**: *www.dmitryjum.com/blog?tag=swing_bridge*
- *github.com/dmitryjum/swing_bridge*
- Built **PixelProbe**, a **Next.js + TypeScript** app using **Puppeteer** to detect hidden third-party tracking by analyzing live network requests; optimized page rendering via request blocking and **OpenAI**-assisted classification. **Read about it**: *www.dmitryjum.com/blog?tag=pixel-probe*
- *github.com/dmitryjum/pixel-probe* | *fpd-checker.vercel.app*
- **WordPress & CMS**: Implement custom themes and plugins.
- Configured and deployed GTM servers, established Google Cloud (GCP) resources—static IPs, load balancers, SSL certificates.
- **Technical Consulting**: Collaborate with stakeholders to define project requirements and terms.

Skillit - Senior Software Engineer
Remote
08/2023 - 03/2024

- **Company Overview**: Skillit provides construction companies access to a rapidly growing database of qualified workers and a suite of worker-first hiring tools (Built with **Ruby on Rails, Hotwire(Turbo Frames/Streams), ViewComponents, StimulusJS, Tailwind CSS**).
- Shipped search and profile features that improved recruiter workflows, including **contextual worker profiles and stateful search-to-profile navigation**
- Built core **inbox functionality**, including conversation reply flows and accurate **unread-count tracking** across worker/employer messaging
- Implemented Segment and HubSpot synchronization for user and onboarding data using **background jobs, serializers, and event-driven Rails patterns**
- Strengthened admin security and operational access by refining **Avo/Pundit authorization** for staff and restricted resources
- Supported production deployment workflows on AWS ECS Fargate
- **Read about my work**: *www.dmitryjum.com/blog?tag=Skillit*

Atlas Obscura - Full Stack Software Engineer
New York, Remote
05/2020 - 09/2022

- **Company Overview**: As a software engineer, I was responsible for the maintenance and implementation of new features on the main **Ruby on Rails and Postgres** web application (**ViewComponent, Hotwire (Turbo Frames/Streams), Stimulus.js, and Tailwind CSS)**
- Improved API reliability with a structured error handler
- Led **TDD-driven API development** for future mobile apps
- Built Sign Up/In IOS app feature and assisted an iOS developer in building other **features with Swift UI**, expanding my skills and knowledge
- Collaborated with the engineering manager to implement regular code reviews, ensuring team alignment with the ongoing application rearchitecture.

- Managed production deployments of Rails application on **Heroku**.
- **Read about my work:** *www.dmitryjum.com/blog?tag=Atlas+Obscura*

Independent Consultant - Full Stack Software Engineer
New York, NY
01/2019 - 04/2020

- Implemented different solutions with **Ruby on Rails and JS and JS frameworks** for various clients.
- **Key contract engagement in the period: IVFqC(Althea Science)** - Applications to track IVF processes and perform laboratory quality control (Generations and Reflections applications **Ruby on Rails, JavaScript, Postgres**)
- Developed a **LocalStorage-backed autosave queue** that preserved and retried writes during connectivity issues, reducing risk of data loss in data-entry-heavy workflows.
- Implemented **session timeout monitoring** with user warnings, timer reset logic, and forced sign-out to improve application **security**.
- Resolved **autosave reliability** issues in rapid form workflows by simplifying server-side create/update handling and improving frontend event handling.
- Supported deployment and maintenance of **Rails** applications on **Heroku**.
- **Read about my work:** *www.dmitryjum.com/blog?tag=Althea+Science*

XO Group - Full Stack Software Engineer
New York, NY
01/2016 - 11/2018

- **Company Overview**: A consumer internet and media company devoted to weddings, pregnancy, and related topics
- Built **React & Node.js** applications (MobX, Redux), as engagement ring wishlist and wedding dress quiz.
- Secured **Express.js server with JWT** that serves product admin application
- Refactored product gallery filters using **Backbone.js in a Rails** application,
- **Mentored** junior developers, providing guidance and assisting with troubleshooting technical issues.
- Managed app deployments to **Heroku** and AWS with **Kubernetes.**

Alumnifire - Full Stack Software Engineer
New York, NY
11/2014 - 12/2015

- **Company Overview**: An alumni networking platform that enables members to create opportunities for one another on their own terms (**Ruby on Rails, JavaScript, ElasticSearch, Postgres, Sidekiq**)
- Created a **1,600+ US college dataset** with enhanced search, developed **statistical tracking tools** with **Google Analytics** integration, built moderator tools and **designed a quiz and internship search platforms**.
- ***Read about my work:*** *www.dmitryjum.com/blog?tag=AlumniFire*
